

POLICY OF JSC SAVUSHKIN PRODUCT REGARDING PRODUCT QUALITY AND SAFETY

The strategic target of our Policy is to establish Interested Parties' stable confidence in the Company as a producer of natural foodstuffs: dairy products, combined dairy and milk-containing products which correspond to the best world analogs and have a high and stable quality and safety.

The Policy of Savushkin Product establishes the basis for setting and analysis of measurable targets in relation to quality and safety of foodstuffs and corresponds to the Company's purpose and context.

Principles which let us reach our strategic target:

- * Stable position at the won markets and development of new selling markets on the basis of mutually beneficial partnership with the Consumer
- * Improvement of the Company's economic performance, implementation of projects complying with the principles of cost efficient and socially responsible use of raw materials and material resources
- * Large-scale advertising activities and marketing research to improve the Consumer's awareness and satisfaction
- * Establishment of mutually beneficial and trust-based relations with Suppliers, which promotes improved quality and safety of purchased raw materials, materials, and package
- * Maintaining high level of the production sanitary condition
- * Identification, assessment and control of all hazards in the production process in order to minimize them; foodstuff protection, struggle against food fraud
- * Development and production of new product types on the basis of prospective market and specific demand analysis.
- * Reduced food losses and food waste
- * Formation of positive safety and quality culture for foodstuffs
- * Continuous development of the staff professional skills, training on the requirements of acting systems of food quality and safety management, work initiative encouragement
- * The results of activities of every employee have an impact on the foodstuff quality and safety, production stability and confidence about the future
- * Continuous improvement of management systems
- * When carrying out the Company's activities, being guided by the legislation of the Republic of Belarus with regard to foodstuff safety, EU regulatory documents, standards of Codex Alimentarius Commission, mutually agreed requirements of the Consumer for the foodstuff quality and safety, as well as other obligatory requirements
- * Management automation and technological process computerization, improvement of facilities and equipment on the basis of scientific and technical achievements to improve quality and safety of the products manufactured
- * Implementation of information systems ensuring control of business process efficiency, as well as internal and external communications
- * Informing the staff on this Policy, use and maintaining of the Policy at all organizational levels, timely revision of the Policy to ensure that it is constantly up-to-date

Compliance with these principles and the Corporate Code of Savushkin Product ensures sustainable development of the Company and profit for further modernization and production expansion to the benefit of the Interested Parties
